- Network administration

INTRODUCTION

An experienced and qualified full stack web developer with a wide technical knowledge, comfortable with both front-end and back-end. Proven to be successful in creating applications and web sites that engage users at scale, collaborating in a team or working individually.

PROFESSIONAL EXPERIENCE

Mar 2009 – Present

Mediadroid - Web Application Developer / Owner
- Initially creating Facebook applications, which, at peak had a total of 66 million users, which allowed me to hone my abilities in dealing with high traffic problems, scaling and performance issues, both at application and server levels. Later continued to create web sites and applications.

Apr 2017 – Present

Heavenly Care PHC Services (Edinburg, Texas) – Remote Support
- Supporting healthcare agency with Windows Server, Terminal Services, VOIP, networking and general support.

Sep 2003 – Feb 2009

Atyourpace Ltd. - Web Developer and Systems Administrator
- Created web applications with a small team of developers, including Course Manager Platform used by 12 universities and colleges to deliver educational training software.

RECENT PROJECTS

Mar 2020

Pricearoo.com
- Amazon price tracker that monitors prices, and sends email alerts integrated with SendGrid to help shoppers get the best deal.
- Laravel, PHP, JavaScript, Nginx, HTML5, SCSS/SASS, SQL, Git, API, Webpack, ChartJS

Sept 2018

101soundboards.com
- Using Laravel and Vue.js, this popular web site contains hundreds of thousands of audio clips. Inline editing, inline search, social sharing features, dynamic video generation, cloud transcription, extensive SEO with dynamic sitemaps, and numerous automated backend tasks. Real-time communication with NodeJS & WebSockets. Unit and browser testing. 220k+ MAU. Alexa, Google Home and Twitter integrations.
- Laravel, Vue.js, React, PHP, JavaScript, Nginx, HTML5, CSS/SASS, SQL, Git, Webpack, PWA, Node.js, WebSockets

Aug 2018

SMS Text Messaging and Voice Calling Slack Project
- NodeJS application deployed with Google App Engine. Integrates Slack with SMS, MMS and automatic voice messages via Twilio. Approximately 15,000 messages a month, and is an invaluable communication method for a Texas healthcare provider implementing Electronic Visit Verification (EVV).
- NodeJS, JavaScript ES6, Slack integration, Twilio, SMS and VOIP

Oct 2019

React Native Android and IOS apps for 101soundboards.com
- Using React Native, created a build system that can generate Android and iOS apps dynamically. Published in Google Play App Store.
- React Native, JavaScript, Expo, NodeJS, API integration, bash scripting
